The Media Access Control (MAC) address identifies your computer on the network and allows you to access the Internet. You can find the MAC address by following these steps:

1) Click -> START button to access the Start menu.
2) Click -> RUN

3) Type -> cmd; Click -> OK
4) At the C:\> prompt, type -> ipconfig/all

5) Hit the Enter key
6) Locate Ethernet Physical Address (12 digit number, e.g., 01-02-03-04-05-06)

7) Enter the 12 digit number, with hyphens, on the Network Access form
8) Return to: **Academic Computing Center (ACC) located in PCTB 116 410-955-2359**
